- [PTaaS Deliverables](#)

# PTaaS Overview

## What is PTaaS?

Simulated, manual attacks to identify real exploitable weaknesses in your application or system.

## Ideal For

- Web apps with login/session logic
- Critical APIs
- Periodic security reviews

## Plans

- Starter: Basic recon and OWASP Top 10 testing
- Pro: Full manual pentest, retest optional
- Enterprise: Full scope, priority response, custom integration

# How Our PTaaS Works

## Steps

1. Define your target & window
2. GrintOps assigns certified pentesters
3. Exploitation and documentation
4. Optional retesting after remediation

## Testing Methods

- Manual, authenticated, and blackbox testing
- Exploitation proof and CVSS scoring

# PTaaS Deliverables

## Deliverable Items

- Executive summary report
- Full technical findings with screenshots
- Exploit narrative and recommendations
- Retest status report (Pro+)
