PSaaS Overview

What is PSaaS?

A service to simulate realistic phishing attacks for awareness training.

Use Cases

- Employee security testing
- Audit support (SOC2, ISO)
- Monthly internal awareness campaigns

Plans

- Starter: Basic email campaign with static template
- Pro: Targeted phishing + tracking
- Enterprise: Multi-wave + custom domain and training follow-up

How Our PSaaS Works

Steps

1. Choose template or create custom scenario
2. Add targets via portal or upload CSV
3. Schedule & launch campaign
4. Analyze results in report

Tracking Features

- Open rate, click rate, submission rate
- Timeline of victim interaction

PSaaS Deliverables

Deliverable Items

- Campaign report (PDF & CSV)
- Department & role-based breakdown
- Awareness heatmap
- Recommended next training step
