# TOaaS Overview

## What is TOaaS?

GrintOps TOaaS enables scalable and automated software testing pipelines tailored for modern development workflows.

## Ideal For

- Teams practicing CI/CD
- SaaS platforms needing reliable regression checks
- Apps requiring load, functional, and E2E testing

## Plans

- Starter: Functional & smoke tests
- Pro: + Load & E2E test automation
- Enterprise: + Test orchestration, custom test dashboard

# Getting Started with TOaaS

## Step 1 – Define Testing Scope

We gather details on your app architecture, APIs, and environments.

## Step 2 – Design Testing Pipelines

We set up automated test runners based on your needs.

## Step 3 – Monitor & Improve

Review detailed reports and get alerts for failures and regressions.

# TOaaS Methods

## Test Types Supported

- Unit Testing
- API Testing (Postman, Insomnia, RestAssured)
- UI Testing (Playwright, Cypress, Selenium)
- Load/Stress Testing (k6, JMeter)
- Mobile Testing (Appium)

## Tools & CI Integrations

- GitHub Actions, GitLab CI, Jenkins
- Allure, TestRail, Xray (optional integrations)

## Test Management

- Test coverage reports
- Scheduled runs & triggered runs
- Environment-aware testing

# How Our TOaaS Works

## Steps

1. You define test targets & access
2. GrintOps configures test runners & scripts
3. Pipelines are executed on every push, schedule, or PR
4. Reports available in portal or integrated to Git

# TOaaS Deliverables

## Deliverable Items

- Test pipeline configurations (CI/CD-ready)
- Coverage reports (HTML/JSON)
- Load/stress test results
- Video recording (UI tests, Pro+)
- Test case documentation (Enterprise)

# TOaaS SLA

## Service Level Agreements

Tier	Setup Time	Test Frequency	Reporting
Starter	5-7 days	On push/manual	HTML report
Pro	3-5 days	Scheduled + CI	Dashboard + Email
Enterprise	2-4 days	Full orchestration	Git-integrated + alerts

# TOaaS FAQ

## Frequently Asked Questions

**Q: Can I provide my own test cases?**

A: Yes, we can run your existing test scripts or enhance them.

**Q: Do you only support web apps?**

A: No, we support APIs, web, mobile (Android/iOS), and CLI-based apps.

**Q: Will this affect my production systems?**

A: No. All testing is performed on staging or sandbox unless explicitly agreed.

**Q: Can I see test runs visually?**

A: Yes. Pro+ tiers support UI test video logs and dashboards.
