Vulnerability Assessment as a Service (VAaaS)

VAaaS Overview

What is VAaaS?

GrintOps VAaaS helps detect known vulnerabilities in web apps, APIs, and exposed systems with professional-grade assessments.

Ideal For

- Web/API product teams
- SaaS providers
- Compliance-preparing startups

Plans Available

- Starter: Automated scan only
- Pro: + Manual validation, CVSS scoring
- Enterprise: + Custom scope, integration, retesting

How Our VAaaS Works

Steps

1. Define scope (via portal or onboarding form)
2. GrintOps runs vulnerability scan (OWASP, CVE-based)
3. Analysts validate key findings (Pro+)
4. Deliver report via portal

VAaaS Deliverables

- Executive PDF report
- Technical HTML report with risk details
- Severity ranking (CVSSv3)
- Patch recommendations
- Retesting summary (Enterprise)
